

JUAN CARLOS POBLETE

JUNIOR FULLSTACK
SOFTWARE DEVELOPER

Crafting code like a modern-day wizard, I navigate digital realms with my trusty keyboard.

Lost in Stack Overflow or pondering semicolons, I wield my Rubik's cube and wit to vanquish bugs like an algorithmic ninja.

My code is like a fine wine—improving with age and complexity, leaving users wondering, "How did it do that?" This guy has a low WTF/min ratio on his code!" let's turn ideas into digital reality!
